What's new?

- **ConvertXtoDVD 5 vs V 4**

If you're wondering if it is really going to be worth updating to the new version, what does the V5 has in store, then check out [this guide](#) and make up your mind!

Also, note that the Beta version will be released and available for everyone during the month, keep an eye [on the forum](#) to get the link!

- **Don't miss any of the best US series!**

With all your favorite shows starting their new season, make sure you're not going to miss any episodes of Homeland, Dexter or Grey's anatomy, etc... Check out [this video](#) that explains how to find streaming videos of your favorite series and shows and how to download them to your PC with our [VSO Downloader](#).

- **Rent PhotoDVD**

A few weeks ago we introduced the possibility to rent ConvertXtoDVD for people who only have a limited need for the software. This month we are happy to announce that the same can be done with [PhotoDVD](#). If you only want to make a DVD slideshow of your photos for a special occasion (wedding, birthday, anniversary...) why not just "rent" the software for a week? This [cost-effective solution](#) is brought to you in partnership with Roozz.

VSO Helpdesk

- On how many computers can the software be installed ?

With each license bought (even Goldmember and lifetime licenses), the software can be installed on up to 2 PCs (laptops, etc). If you wish to install the software on more than 2 PCS, you need to buy an additional license.

We offer bulk and corporate licenses, please contact us for more details.

Did you know?

-New Guide for Blu-ray and DVD Converters

Last month we unveiled the major versions of Blu-ray Converter Ultimate 2 and DVD Converter 2. Check out how easy it is to use these new programs: the [DVD Converter](#) guide and [Blu-ray Converter](#) guide are now online.

If you want to contact us please use [support form](#) or our [Facebook](#) and [Twitter](#) accounts.

Bye for now!
